#### **Consolidated Revenues**

For the three-month period ended March 31, 2019, ABS-CBN generated consolidated revenues of ₱10.4 billion from advertising and consumer sales, ₱1.3 billion or 15.0% higher year-on-year.

Advertising revenues increased by \$\mathbb{P}\$1.1 billion or 24.4% higher, attributable to both political placements and growth in regular advertising. Excluding political placements, regular advertising increased by \$\mathbb{P}\$633 million or 14.6% higher year-on-year. Consumer sales increased by \$\mathbb{P}\$289 million mainly resulting from higher TVPlus Boxes sold and theatrical receipts from ABS-CBN Films.

Comparative revenue mix is as follows:

	1Q 2019	1Q 2018
Advertising revenues	52%	48%
Consumer sales	48%	52%

#### **Consolidated Costs and Expenses**

Direct costs and expenses amounted to \$\mathbb{P}9.5\$ billion, or a 7.6% increase year-on-year.

Production cost increased by ₱177 million or 5.7%. This was due to the increase in Company's facilities-related expenses, travel and transportation and employee related costs amounting to ₱165 million or 8% increase year-on-year.

Cost of sales and services increased by ₱167 million or 5.3% year-on-year. The increase comes from the growth of Sky Cable's broadband business which drove bandwidth costs up by ₱34 million or 2% higher year-on-year. The increase also came from employee related costs amounting to ₱81 million or 2% higher year-on year, as well as a 9% increase year-on-year of ABS-CBN TVPlus box sales. These costs were partially offset with the cessation of the ABS-CBN Mobile MVNO business.

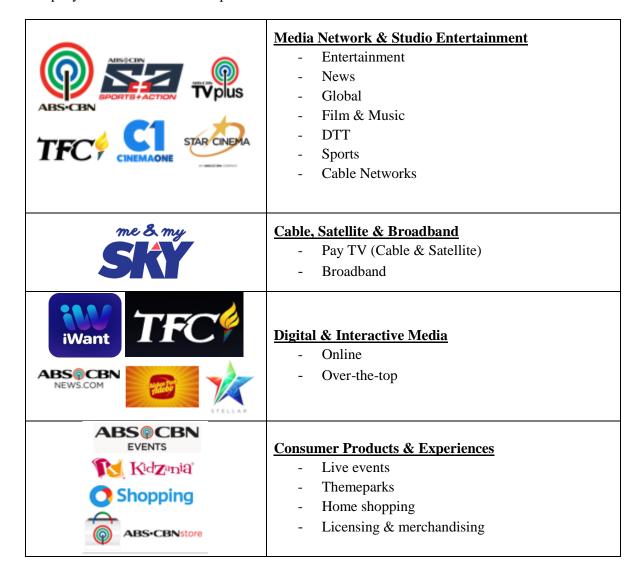

GAEX increased by £319 million or 12.6% compared to the previous year. The increase is attributable mainly to the Company's investments on various initiatives such as content building, information security measures, and digital initiatives.

#### **Net Income and EBITDA**

The Company generated \$\mathbb{P}808\$ million net income for the three-month period ended March 31, 2019. EBITDA increased to \$\mathbb{P}2.197\$ billion, an 11.4% increase year-on-year.

#### **Business Segments**

For management purposes, the Company categorizes its operations into the following reportable businesses: (i) Media Networks & Studio Entertainment, (ii) Cable, Satellite & Broadband, (iii) Digital & Interactive Media and (iv) Consumer Products & Experiences. This segmentation is the basis upon which the Company measures its business operations.

The following analysis presents results of operations of the Company's business segments for the three-month period ended March 31, 2019:

Segment	Operating	g Revenue	Net Income			
	Q1 2019	Q1 2018	Q1 2019	Q1 2018		
Media & Studio Entertainment	₽7,287	₽6,184	₽1,064	₽625		
Cable, Satellite & Broadband	2,303	2,219	(67)	2		
Digital & Interactive Media	401	245	(145)	(164)		
Consumer Product & Experiences	367	362	(44)	(53)		

#### A. Media Networks & Studio Entertainment

ABS-CBN channels (Channel 2, Sports & Action, Cinemo, Yey, Knowledge Channel, Teleradyo, MYX, Jeepney TV, O Shopping Channel, Asianovela Channel, and Movie Central) led in national audience share and ratings. Overall audience share was at 57.23% for the first quarter of 2019. ABS-CBN programs continuously filled out the Top 10 highest rating programs in March 2019, which was led by the top rating program and long running telenovela "Ang Probinsyano", with an average national TV rating of 41.2%. "World of Dance Philippines", "The General's Daugther", "Ngayon at Kailanman", "Maalala Mo Kaya", "Halik", and "Wansapanataym" were also included in the Top 10 programs.

Aside from the top programs mentioned above, ABS-CBN's TV Patrol and Bandila were among the most watched news and current affairs programs with average national ratings of 30.8 and 2.9, respectively.

Revenue from international business decreased by \$\frac{\text{P}44}{24}\$ million or 3.2% year-on-year. The decrease in international business was mainly attributable to Global's cessation of its money remittance and cargo business which reduced its revenues by \$\frac{\text{P}39}{230}\$ million.

Film & Music's revenues increased by ₱110 million or 21% higher year on year. During the first quarter, 3 locally produced quality movies added up to Star Cinema's movie library build-up namely: Sakaling Maging Tayo, Alone Together and Eerie. Total gross receipts generated from these movies, including receipts from Fantastika reached almost ₱660 million.

ABS-CBN TVPlus contributed significant increase in revenues during the first quarter with a total of 638 thousand boxes sold, or a 9% increase in comparison to same period last year.

#### B. Cable, Satellite & Broadband

Sky's revenue increased by \$\mathbb{P}84\$ million or 4% year-on-year. The increase in Sky's performance was triggered by the increase in broadband and DTH subscribers by 26 and 531 thousand, respectively.

#### C. Digital & Interactive Media

Since the Company's direction is to go digital, various platforms are continuously developed and enhanced to address the rapid digital preference of its audiences. This thrust in digital content production in various platforms such as, Push, ABS-CBN Lifestyle, Choose Philippines, Iwant, ABS-CBN Exclusives and Entertainment, further drove consumer engagement reflected through increasing monthly active subscribers throughout the year. In 2018, the Company also released its newest digital platform, "Iwant", wherein content from entertainment, music, films, publishing, as well as originals are made available to subscribers.

Total revenues generated from digital platforms amounted to \$\mathbb{P}401\$ million, higher by 64% compared to the same period last year.

#### D. Consumer Products & Experiences

Kidzania generated \$\mathbb{P}\$131 million in revenues with a total of 113 thousand visitors, while ABS-CBN Studio Experiences generated \$\mathbb{P}\$6 million in revenues with a total of 18 thousand visitors for the first quarter of 2019.

# NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(Amounts in Thousands Unless Otherwise Specified)

#### 1. Corporate Information

ABS-CBN Corporation ("ABS-CBN" or "Parent Company") was incorporated in the Philippines on July 11, 1946. On July 27, 1994, the Philippine Securities and Exchange Commission (SEC) approved the extension of the corporate term of the Parent Company for another 50 years. The Parent Company's core business is television and radio broadcasting. Its subsidiaries and associates are involved in the following related businesses: cable and direct-to-home television distribution and movie production, audio recording and distribution, video/audio post-production and film distribution. Other activities of the subsidiaries include merchandising, internet services and theme parks. The Parent Company is a holder of a legislative franchise to construct, install, operate and maintain, for commercial purposes and in the public interest, radio and television broadcasting stations in the Philippines. The latest franchise renewal was approved on March 30, 1995 for a period of 25 years.

Lopez Inc., a Philippine entity, has 56% economic interest in the Parent Company, with 79% voting rights. Lopez, Inc. is the ultimate Parent Company.

The common shares of ABS-CBN were listed beginning July 8, 1992 and have been traded in the Philippine Stock Exchange (PSE) since then.

The registered office address of the Parent Company is ABS-CBN Broadcast Center, Sgt. Esguerra Avenue corner Mother Ignacia St., Quezon City.

#### 2. Summary of Significant Accounting and Financial Reporting Policies

#### **Basis of Preparation**

The interim condensed consolidated financial statements of ABS-CBN and its subsidiaries (collectively referred to as "the Company") have been prepared on a historical cost basis, except for investments in equity shares and club shares which have been measured at fair value. The consolidated financial statements are presented in Philippine peso, which is the Parent Company's functional and presentation currency. All values are rounded to the nearest thousand, except for number of shares, per share amounts and when otherwise indicated.

#### Statement of Compliance

The interim condensed consolidated financial statements of the Company were prepared in compliance with Philippine Financial Reporting Standards (PFRSs).

The interim condensed consolidated financial statements do not include all of the information and disclosures required in the annual consolidated financial statement and should be read in conjunction with the 2018 audited annual consolidated financial statements, comprising the consolidated statements of financial position as at December 31, 2018, 2017 and January 2017, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years ended December 31, 2018, 2017 and 2016, issued and approved on February 28, 2019 (referred to as the "2018 audited annual consolidated financial statements").

#### Changes in Accounting Policies and Disclosures

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Company's 2018 audited annual consolidated financial statements.

#### Amendments to PFRS 9, Prepayment Features with Negative Compensation

Under PFRS 9, a debt instrument can be measured at amortized cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to PFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract. The amendments should be applied retrospectively and are effective from January 1, 2019, with earlier application permitted.

These amendments have no impact on the interim condensed consolidated financial statements of the Company.

#### PFRS 16, Leases

PFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under Philippine Accounting Standards (PAS) 17, *Leases*. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognize a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognize the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessees will be also required to remeasure the lease liability upon the occurrence of certain events (e.g., a change in the lease term, a change in future lease payments resulting from a change in an index or rate used to determine those payments). The lessee will generally recognize the amount of the remeasurement of the lease liability as an adjustment to the right-of-use asset.

Lessor accounting under PFRS 16 is substantially unchanged from today's accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases.

PFRS 16 also requires lessees and lessors to make more extensive disclosures than under PAS 17.

A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs.

The Company is currently assessing the impact of adopting PFRS 16.

• Amendments to PAS 19, Employee Benefits, Plan Amendment, Curtailment or Settlement

The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event.
- O Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in other comprehensive income.

The amendments apply to plan amendments, curtailments, or settlements occurring on or after the beginning of the first annual reporting period that begins on or after January 1, 2019, with early application permitted.

Amendments to PAS 28, Long-term Interests in Associates and Joint Ventures

The amendments clarify that an entity applies PFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the expected credit loss model in PFRS 9 applies to such long-term interests.

The amendments also clarified that, in applying PFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognized as adjustments to the net investment in the associate or joint venture that arise from applying PAS 28, *Investments in Associates and Joint Ventures*.

The amendments should be applied retrospectively and are effective from January 1, 2019, with early application permitted. Since the Company does not have such long-term interests in its associate and joint venture, the amendments will not have an impact on its consolidated financial statements.

Philippine Interpretation on International Financial Reporting Interpretations Committee-23,
 Uncertainty over Income Tax Treatments

The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, *Income Taxes*, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

The interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately
- The assumptions an entity makes about the examination of tax treatments by taxation authorities
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
- o How an entity considers changes in facts and circumstances

An entity must determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

The Company is currently assessing the impact of adopting this interpretation.

- Annual Improvements to PFRSs 2015-2017 Cycle
  - o Amendments to PFRS 3, *Business Combinations*, and PFRS 11, *Joint Arrangements*, *Previously Held Interest in a Joint Operation*

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2019 and to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after January 1, 2019, with early application permitted. These amendments are currently not applicable to the Company but may apply to future transactions.

• Amendments to PAS 12, Income Tax Consequences of Payments on Financial Instruments Classified as Equity

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.

An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application is permitted. These amendments are not relevant to the Company because dividends declared by the Company do not give rise to tax obligations under the current tax laws.

### o Amendments to PAS 23, Borrowing Costs, Borrowing Costs Eligible for Capitalization

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application permitted.

Since the Company's current practice is in line with these amendments, the Company does not expect any effect on its consolidated financial statements upon adoption.

#### Future Changes in Accounting Policies

The standards, amendments and interpretations that are issued, but not yet effective as at March 31, 2019 are disclosed in the next section. The Company intends to adopt these standards, if applicable, when these become effective.

Effective beginning on or after January 1, 2020

Amendments to PFRS 3, Definition of a Business

The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

These amendments will apply on future business combinations of the Company.

 Amendments to PAS 1, Presentation of Financial Statements, and PAS 8, Accounting Policies, Changes in Accounting Estimates and Errors, Definition of Material

The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgments.

An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted. The amendments will not cause any material impact.

Effective beginning on or after January 1, 2021

■ PFRS 17, *Insurance Contracts* 

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- o A simplified approach (the premium allocation approach) mainly for short-duration contracts

PFRS 17 is effective for reporting periods beginning on or after January 1, 2021, with comparative figures required. Early application is permitted. This standard is not applicable to the Company.

#### Deferred effectivity

 Amendments to PFRS 10, Consolidated Financial Statements, and PAS 28, Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

#### 3. Management's Use of Judgments, Estimates and Assumptions

The Company's interim condensed consolidated financial statements prepared under PFRS require management to make judgments and estimates that affect amounts reported in the interim condensed

consolidated financial statements and related notes. Future events may occur which will cause the judgments and assumptions used in arriving at the estimates to change. The effects of any change in judgments and estimates are reflected in the interim condensed consolidated financial statements as they become reasonably determinable.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### **Judgments**

In the process of applying the Company's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements.

Determination of Functional Currency. The Parent Company and all other subsidiaries and associates, except for foreign subsidiaries, have determined that their functional currency is the Philippine peso. The Philippine peso is the currency of the primary economic environment in which the Parent Company and all other subsidiaries and associates, except for foreign subsidiaries, operate. The Philippine peso is also the currency that mainly influences the sale of goods and services as well as the costs of selling such goods and providing such services.

Each foreign subsidiary determines its functional currency (i.e., USD, GBP, JPY, AUD, CAD, EUR or SGD). Thus, the accounts of foreign subsidiaries were translated to Philippine peso for purposes of consolidation to the ABS-CBN Group's accounts.

*Leases*. The evaluation of whether an arrangement contains a lease is based on its substance. An arrangement is, or contains, a lease when the fulfillment of the arrangement depends on a specific asset or assets and the arrangement conveys the right to use the asset.

The Company has entered into lease arrangements as a lessor and as a lessee. Such contracts are accounted for as operating leases when the Company, as a lessee, has determined that the lessor retains substantial risks and benefits of ownership of these properties, and as a lessor, the Company retains substantially all the risks and benefits incidental to ownership of the assets.

The Company has also entered into lease agreements covering certain property and equipment. Such contracts are accounted for as finance leases when the Company, as a lessee, has determined that it bears substantially all the risks and benefits incidental to ownership of said asset and as a lessor, it does not retain all the significant risks and rewards of ownership of the leased assets.

Bayan Telecommunications, Inc. (Bayantel) has entered into an agreement with Sky Cable for the grant of Indefeasible Right of Use (IRU) in certain capacities in the network. The arrangement is assessed as a transaction which contains a lease on the basis that fulfilment of the arrangement is dependent on the use of a specific asset or assets and arrangement conveys a right to use the asset. Sky Cable has accounted for the arrangement as a finance lease on the basis that the lease term is for the major part of the economic life of the asset of 25 years. The IRU was included as part of "Other equipment" account (see Note 10).

The carrying amount of property and equipment under finance lease amounted to \$\mathbb{P}383\$ million and \$\mathbb{P}348\$ million as at March 31, 2019 and December 31, 2018, respectively (see Notes 10 and 31).

#### **Estimates and Assumptions**

The key assumptions concerning the future and other key sources of estimation at the financial reporting

date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Allowance for Doubtful Accounts Prior to 2019. The Company reviews its loans and receivables, including unbilled receivables, at each financial reporting date to assess whether an allowance for impairment should be recorded in the consolidated statement of income. In particular, judgment by management is required in the estimation of the amount and timing of future cash flows when determining the level of allowance required. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes in the allowance.

Allowance for Doubtful Accounts After March 1, 2019

- a. Definition of Default and Credit-Impaired Financial Assets. Upon adoption of PFRS 9, the Company defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:
  - Quantitative Criteria. The borrower is generally more than 60 to 90 days past due on its contractual payments, which is consistent with the Company's definition of default.
  - Qualitative Criteria. The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:
    - a. The borrower is experiencing financial difficulty or is insolvent;
    - b. The borrower is in breach of financial covenant(s); or
    - c. It is becoming probable that the borrower will enter bankruptcy or other financial reorganization.

The criteria above have been applied to all financial instruments held by the Company and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the probability of default (PD), loss given default (LGD) and exposure at default (EAD) throughout the Company's ECL calculation.

b. Simplified Approach for Trade and Other Receivables. The Company uses a provision matrix to calculate ECLs for trade and other receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns.

The provision matrix is initially based on the Company's historical observed default rates. The Company calibrates the matrix to adjust the historical credit loss experience with forward-looking information. At every financial reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

c. Macro-economic Forecasts and Forward-looking Information. Macro-economic forecasts is determined by evaluating a range of possible outcomes and using reasonable and supportable information that is available without undue cost and effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Company takes into consideration different macro-economic variables to ensure linear relationship between internal rates and outside factors. Regression analysis was used to objectively determine which variables to use.

Predicted relationship between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analyzing historical data over the past 3 years. The methodologies and assumptions including any forecasts of future economic conditions are reviewed regularly.

Provision for doubtful accounts amounted to ₽75 million and ₽89 million for the three months ended March 31, 2019 and 2018, respectively (see Notes 7 and 27). Trade and other receivables, net of allowance for doubtful accounts, amounted to ₽11.0 billion and ₽10.4 billion as at March 31, 2019 and December 31, 2018, respectively. Allowance for doubtful accounts amounted to ₽2.0 billion as at March 31, 2019 and December 31, 2018 (see Note 7).

Recoverability of Goodwill, Cable Channels, Trademarks, Licenses and IP Block. The Company performs recoverability testing annually or more frequently when there are indications of impairment for goodwill and intangible assets with indefinite lives. The Company has identified that cable channels of CPI, trademarks, licenses and IP block have indefinite lives. Recoverability testing requires an estimation of the value-in-use of the cash-generating units to which goodwill, cable channels, trademarks, licenses and IP block to operate wireless business are allocated. Goodwill acquired through business combination has been allocated to one cash-generating unit which is also the operating entity acquired through business combination and to which the goodwill relates. Estimating the recoverable amount of the cash-generating unit involves significant assumptions about the future results of the business such as revenue growth and gross margins in its cable subscription, advertising, broadband and mobile businesses, and discount rates which were applied to cash flow forecasts. The cash flow forecasts were based on financial budgets approved by senior management of the subsidiaries covering a five-year period.

Present Value of Pension Obligation and Other Employee Benefits. The cost of defined benefit obligation is determined using actuarial valuations. The actuarial valuation involves making assumptions such as discount rates and future salary increases, among others. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each financial reporting date.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation. Future salary increases are based on expected future inflation rates for the specific country.

Further details about the assumptions used are provided in Note 30.

Employee leave entitlements that is expected to be settled within one year from reporting date is classified as a current liability in the consolidated statement of financial position. Otherwise, this is classified as part of the noncurrent portion of other employee benefits liability. Accrued pension obligation and other employee benefits of the Company amounted to \$\mathbb{P}5.7\$ billion and \$\mathbb{P}5.6\$ billion as at March 31, 2019 and December 31, 2018, respectively (see Note 30).

Recoverability of Deferred Tax Assets. Management's assessment of the deferred tax assets to be recognized involves significant judgments and is based on assumptions regarding the entities' current performance, future plans for the business and tax planning strategies. Management exercised judgment on the financial forecast used in determining the forecasted taxable income of the entities, including the timing of reversal of future taxable and deductible temporary differences.

Provisions and Contingencies. The Company is currently involved in various legal proceedings and periodic examinations by tax authorities, which may result in taxation issues due to different interpretation and implementation of the relevant laws and regulations. Significant estimates and judgment are made by management regarding the outcome of these legal proceedings and tax examinations. The Company's estimate of the costs of the resolution of these claims has been developed in consultation with their external legal counsels and considering the correspondences with relevant tax authorities and any relevant historical and recent judgments issued by the court or tax authorities. Any change on these assumptions and the estimates may have a material impact on the Company's consolidated financial statements (see Note 36).

#### Seasonality of Operations

The Company's operations are not generally affected by any seasonality or cyclicality.

#### 4. Significant Acquisitions, Re-organization and Material Noncontrolling interests

#### Significant Acquisitions and Re-organization

a. Subscription agreement between Sky Cable, Sky Vision, Sampaquita Communications PTE LTD (Sampaquita) and the Parent Company

On December 18, 2017, Sky Cable, Sky Vision, Sampaquita and the Parent Company entered into a subscription agreement with the following salient provisions:

- The Parent Company agreed to subscribe to 162,373,928 PDRs for ₱9.6853 per PDR from Sky Vision.
- Sky Cable agreed to offer 314,910,225 shares to its shareholders from an increase in capital stock. Sky Vision agreed to subscribe to 288,338,018 offered shares and the Parent Company agreed to subscribe to 26,572,207 offered shares for ₱9.6853 per share.

The Parent Company and Sampaquita agreed that the following aggregate economic interests shall be maintained:

  of Sky Cable on a fully diluted basis.

On December 19, 2017, the Parent Company and Sky Vision paid Sky Cable their respective subscription for shares. The Parent Company and Sampaquita also paid Sky Vision their subscription for PDRs. The payment of Sampaquita of P1.2 billion is recorded under "Deposit for future subscription" under "Trade and Other Payables" account in the 2018 interim condensed consolidated statement of financial position (see Note 17). As at March 31, 2019, the PDR instruments remain unissued.

#### b. Merger of ABS-CBN Publishing and CPI

On January 25, 2018, the Board of Directors (BOD) of the Parent Company approved the merger of ABS-CBN Publishing and CPI, with the latter as the surviving corporation. The SEC approved the merger on September 18, 2018. The merger has no impact on the interim condensed consolidated financial statements.

In the United States and in other locations (which include Middle East, Europe, Australia, Canada and Japan), the Company operates its cable and satellite operations to bring television programming outside the Philippines.

The Company does not have revenue from transactions with a single external customer amounting to 10% or more of the Company's revenues.

#### **Inter-segment Transactions**

The Executive Committee, the Company's chief operating decision maker, monitors operating results of its business segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss and is measured consistently with operating profit and loss in the consolidated financial statements.

On a consolidated basis, the Company's performance is evaluated based on consolidated net income for the year, earnings before interest, taxes and depreciation and amortization (EBITDA) and EBITDA margin. EBITDA margin pertains to EBITDA divided by gross revenues.

EBITDA and EBITDA margin are non-PFRSs measures.

The following table shows the reconciliation of the consolidated EBITDA to consolidated net income:

Members of the BOD may subscribe up to 100,000 shares. The subscription price for the first 2,000 shares will be at a 15% discount on the closing price as at the offer date or 45-day weighted closing prices, whichever is lower. There will be no discount on the subscription price for the shares subscribed in excess of 2,000 shares. The subscription price will be paid in five years (see Note 17).

As at March 31, 2019, the Company accepted the total ABSP subscription from participants of 11,391,500 common shares.

The primary terms of the grant are as follows:

Grant date	February 28, 2018
Number of options granted	11,391,500
Offer price per share	₽29.50
Option value per share	₽2.22

The fair value of equity-settled share options granted is estimated as at the date of grant using the Black-Scholes Option Model, taking into account the terms and conditions upon which the options were granted. The following table lists the inputs to the model used for the option grants:

Expected volatility	22.38%
Weighted average share price	₽29.50
Risk-free interest rate	4.71%
Expected life of option	5 years
Dividend yield	1.89%

The expected volatility reflects the assumption that the historical volatility is indicative of future trends, which likewise, may not necessarily be the actual outcome. The expected life of the options is based on historical data and is not necessarily indicative of exercise patterns that may occur. No other features of options grant were incorporated into the measurement of the fair value of the options.

As at March 31, 2019, there is no exercisable shares under ABSP.

The ABSP does not have a dilutive effect because the average market price of the common shares during the period is less than the exercise price under the option.

### **Retained Earnings**

Further, the Parent Company's loan agreement with its creditors limits the declaration of dividends up to 50% of the net income after tax for the immediately preceding financial year. This limitation has been in effect since 2004 resulting to an accumulation of unappropriated retained earnings (see Note 18).

### Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate such value:

Cash and Cash Equivalents, Short-term Investments, Trade and Other Receivables and Trade and Other Payables. Due to the short-term nature of transactions, the fair values of these instruments approximate the carrying amounts as at financial reporting date.

*Deposits.* Fair value of these instruments is computed by discounting future cash flows using the risk-free interest rates for similar type of instruments adjusted for credit risk.

AFS Investments/Financial assets at FVOCI. The fair values of publicly-traded instruments were determined by reference to market bid quotes as at financial reporting date. The fair values of the non-listed equity investments have been estimated using a discounted cashflow model. The valuation requires management to make certain assumptions about the model inputs, including forecast cash flows, the discount rate, credit risk and volatility. The probabilities of the various estimates within the range can be reasonably assessed and are used in management's estimate of fair value for these non-listed equity investments.

Interest-bearing Loans and Borrowings. Fair value was computed based on the following:

	Fair Value Assumptions
Term loans	Estimated fair value is based on the discounted value of future cash flows using the applicable risk-free rates for similar types of loans adjusted for credit risk. The interest rates used to discount the future cash flows have ranged from 0.4% to 3.7%.
Other variable rate loans	The face value approximates fair value because of recent and frequent repricing (i.e., 3 months) based on market conditions.

Obligations for Program Rights. Estimated fair value is based on the discounted value of future cash flows using the applicable risk-free rates for similar types of loans adjusted for credit risk.

*Convertible Note.* In 2019 and 2018, fair value was computed based on the discounted value of future cash flows using the applicable BVAL rate.

*Customers' Deposits.* The fair values were calculated by discounting the expected future cash flows using the applicable BVAL rates ranging from 2.7% to 4.7% in 2019.

There were no transfers between levels in the fair value hierarchy as at March 31, 2019 and December 31, 2018.

### Offsetting of Financial Assets and Financial Liabilities

There is no offsetting of financial assets and financial liabilities as at March 31, 2019 and December 31, 2018.

### 34. EPS Computations

The following table presents information necessary to calculate EPS:

**Three Months Ended March 31** 

	(Unaudited)

### 36. Contingent Liabilities and Other Matters

a. The Parent Company has contingent liabilities with respect to claims and lawsuits filed by third parties. The events that transpired last February 4, 2006, which resulted in the death of 71 people and injury to about 200 others led the Parent Company to shoulder the burial expenses of the dead and medical expenses of the injured, which did not result in any direct or contingent financial obligation that is material to the Parent Company. The Parent Company has settled all of the funeral and medical expenses of the victims of the tragedy. Given the income flows and net asset base of the Parent Company, said expenses do not constitute a material financial obligation of the Parent Company, as the Parent Company remains in sound financial position to meet its obligations.

As at March 31, 2019, the claims, including those in connection with the events of February 4, 2006, are still pending and remain contingent liabilities. While the funeral and medical expenses have all been shouldered by the Parent Company, there still exist claims for compensation for the deaths and injuries, the amount of which have not been declared and cannot be determined with certainty at this time. Management is nevertheless of the opinion that should there be any adverse judgment based on these claims, this will not materially affect the Parent Company's financial position and performance.

b. In relation to the consolidation of Sky Cable and Home Cable in 2004, a competitor television broadcasting company (complainant) filed a case before the National Telecommunications Commission (NTC) for unlawful merger and unlawful cross-ownership and common control and operations of telecommunications companies and cable companies with a prayer for cease and desist order. As at March 31, 2019, the case is still pending before the NTC. Management

believes that the case filed by the complainant is without legal basis and would not have a material impact on the consolidated financial statements.

c. The Company is also subject to periodic examinations by tax authorities and has other legal cases in the ordinary course of business, which are pending in courts or under protest. In consultation with its legal counsel, management believes that the outcome of these examinations and cases are not material to affect the Company's financial position and financial performance.

Disclosure of additional details beyond the present disclosures may seriously prejudice the Company's position. Thus, as allowed by PAS 37, *Provisions*, *Contingent Liabilities and Contingent Assets*, only general descriptions were provided.
